SUMMARY

I specialize in Frontend development and have a very good understanding of Web3 ecosystem. My experience ranges from creating engaging user interfaces to building NFT marketplaces & building on web3 protocols like LENS, and I have a passion for creating innovative solutions that leverage the power of web3 technologies. Eager to contribute to a dynamic team and gain hands-on experience in building modern and responsive web applications.

PROJECTS

GOD Nft Marketplace & Explore

Created a DApp where users can mint & list new NFT on marketplace. Also buy other users NFTs and sell their own and also designed a explore page for anyone to get the get NFTs own by Contract Address and Account address.
- Designed and developed frontend using React.js and Tailwind CSS.
- Implemented Smart contract for marketplace and buy and sell functionality.
- Deployed smart contract on polygon mumbai testnet and frontend on Vercel.
- Also Integrated IPFS to store the NFT metadata.
